

Wonder How Section 179 Works?

Boost Your 2025 Tax Savings with Section 179

You may be able to deduct up to 100% of the purchase price of qualified printing equipment with Section 179, including printers, shakers, curing devices, and more, as long as it's purchased and delivered by December 31, 2025.

IRS's Section 179 tax code is an incentive to encourage businesses to invest in themselves and expand their capabilities.

- **Qualifying Equipment:** Most tangible business equipment, including a wide range of printing machinery, qualifies. Examples include:
 - Screen printing presses, exposure units, and dryers
 - Wide-format, UV, dye-sublimation, and eco-solvent printers
 - Office copiers, multifunction printers
 - Equipment for all custom printing methods
 - 3D printers and plotters
- **New or Used:** Both new and used equipment can qualify for the deduction, provided it is "new" to your specific business and used more than 50% of the time for business purposes.
- **Purchase or Finance:** The deduction applies whether you buy the equipment outright, finance it, or lease it (under a qualifying finance agreement).
- **Timing:** The equipment must be purchased, financed, and placed into service between January 1 and December 31 of the tax year for which you are claiming the deduction.
